## ISAC Hired to Perform In-Depth Security and Vulnerability Analysis of EnviroTech

HUNTSVILLE, AL - Jan 7, 2004 - Information Security and Assurance Corporation (ISAC, Inc.) has secured funding to perform an immediate vulnerability test of EnviroTech's computer network facilities in Huntsville, Alabama and Cookeville, Tennessee.

EnviroTech is one of the leading environmental consulting firms in the Southeast United States. EnviroTech provides accurate, up-to-date testing of soil, water quality and purification, and air pollutants. Because EnviroTech values the integrity of the data provided to its customers, ISAC has been hired to determine if computer network defense capabilities installed by EnviroTech's IT department are adequate and accurate.

ISAC is a small, disadvantaged business in Huntsville, AL that specializes in Information Assurance research, development, and services. For more information on how ISAC can increase the security posture of your network, please contact (256) 348-1724.
